PROJECTS

Job board platform , with client dashboard — [Intouch Link](#)

Instead of going the conventional route and using templates I decided to see if I could design, build and deploy a full job board. The technologies and tools used to build the application were Node.JS, Vue.JS, MongoDB, Heroku, Figma and other third-party tools

Smokey Toast, javascript toast — [Smokey toast link](#)

A simple library clone to see if I could lay the foundation for a toast library using OOP Principles.

Personal Portfolio — See More Projects

[My Portfolio](#)
